## ClipperCreek, Inc. Introduces Cable Management System for Popular HCS and CS Product Lines

ClipperCreek's cable management system keeps cables off the ground and eliminates the need to wind the cable for storage after use. Now one cable management system is available for both ClipperCreek HCS and CS Series single and dual-mount pedestal installations.

## [How Long Does it Take to Charge Your Electric Vehicle?](#)

Are you curious about how many miles of range your EV could gain per hour of charging and how long it would take for a full charge with either Level 1 or Level 2 EVSE? ClipperCreek explains how to make these calculations for yourself, or you can simply use our Electric Vehicle Charge Times & Miles Range Per Hour charts for a quick summary on specific makes and models. [Learn More](#)

## [Staying Safe with Electric Vehicle Supply Equipment](#)

After watching a video by ClipperCreek on EVSE safety, [Charged EVs](#) investigated and found that many charging stations sold on Amazon are not tested and certified for safety by a Nationally Recognized Testing Laboratory. [Green Car Reports](#) picked up the story and concluded that consumers should look for stations that are certified to ensure that a knowledgeable third party has deemed a specific model to comply with basic safety practices. At ClipperCreek we are pleased to see that others are taking safety seriously! [Watch Video](#)

#### **Apply to Be Listed as an EVSE Installer**

[www.ClipperCreek.com](http://www.ClipperCreek.com)

Are you an electrician that installs EVSEs? ClipperCreek maintains a national database of EVSE installers and invites licensed and bonded electricians to participate. As a recommended installer, your company information will be displayed on ClipperCreek's website for customers who search for installers in your area. [Learn More](#)

#### **ClipperCreek Employee with New Chevy Bolt**

[www.ClipperCreek.com](http://www.ClipperCreek.com)

Brandon Bolton surprised co-workers when he arrived to work in his brand new

Chevy Bolt. Bolton (indeed a befitting name for a new Bolt owner) is a Product Specialist at ClipperCreek. He had a few minutes to answer some questions about his exciting new purchase. [Learn More](#)

## The Highest Standards. The Happiest Customers.

*"Thanks again to all there who helped us get the unit delivered in time to meet the installation deadline for the federal tax credit, especially during the holidays. We've been really pleased to get into an electric vehicle at a price we can afford, and federal and state tax credits really help. The HCS-40 EVSE is fantastic – could not be happier with it. It's allowing me to change how often I charge our new Nissan LEAF because it gets the job done so quickly, making the easy even easier."*

- Amy
