PG&E EV Charge Network Program

California's PG&E EV Charge Network Program

Transportation is the largest source of greenhouse gas emissions in California. The state is now pushing for a large increase in the adoption of electric vehicles with a goal of 1.5 million zero emission vehicles on our roads by 2025. ClipperCreek, in partnership with Liberty PlugIns, is approved to provide charging stations to eligible PG&E business customers at little or no upfront cost. To see if your business is eligible to participate in this exciting program, click the link below!

How long does it take to charge an electric car?

www.ClipperCreek.com

This is a very popular question in the EV world. Times to charge an electric vehicle vary by car and charging station. We've made a handy chart showing every make and model of electric cars on the road today with charging times using a variety of charging stations in different power levels. [View our Estimated Charge Times Chart for both EV and PHEV here.](#)

Choose the Perfect Charging Station!

www.ClipperCreek.com

Each electric vehicle owner has different needs for their EV Charging Station depending on the range and power acceptance rate of their EV and their budget. Let us help you choose the perfect charging station for your electric vehicle. Select your vehicle using our EVSE Selector Tool and we will show you our recommended station, an alternate option, and the station you may want if you're interested in future-proofing. [Click here to select your vehicle.](#)

Need to locate an EVSE Installer?

www.ClipperCreek.com

ClipperCreek stations are so easy to install, any electrician can do it. However, we've created a list of electricians in your area that have experience installing charging stations. Do you have a favorite electrician? Well, use them! Otherwise, use our tool if you'd like help locating an electrician. [Learn More](#)

The Highest Standards. The Happiest Customers.

"I bought a HCS-40 Share2 about a year ago and I've just begun using both at the same time. I'm charging a Prius Prime and a Honda Clarity - Everything works as it should, limiting when it should, etc. Also, thanks for the 25 foot cable. You never know where the plugin on the next electric car will be. 25' is the perfect length, no matter where the car's port might be! Thank you for a great, no drama product!"

- Curt P.
